

SOLAR STEP LIGHT

ASSEMBLY INSTRUCTIONS

CONTENTS OF CARTON BOX:

1 x STEP LIGHT
1 x SCREW
1 x PLASTIC SCREW PLUG

1 x ASSEMBLY INSTRUCTIONS

INTENDED USE:

This product is ideal to be used for illuminating outdoor stairs, paths, patio, verandas and decks in your garden. The step light produces a low 5 lumen output at night, and increases to 50 lumen output when motion is detected. This product is intended for domestic use only.

SCOPE OF PRODUCT:

IMPORTANT SAFETY INFORMATION:

- **Carefully read all instructions in this manual before installation of the product.**
- **Keep installation area clean.** Cluttered areas invite accidents.
- **Observe installation area conditions.** Keep work area well lit during installation.
- **Replacement parts and accessories.** When servicing, use only identical replacement parts. Use of any other parts will void the warranty.
- **Verify that installation surface has not hidden utility lines before drilling or driving screws.**
- **Dress properly.** Protective, electrically non-conductive clothes and non-skid footwear are recommended when working with the Solar Step Light. Wear restrictive hair covering to contain long hair.
- **Check for damaged parts.** Before using any product, any part that appears damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for any broken or damaged parts and any other conditions that may affect its operation. Replace or repair damaged or worn parts immediately.
- **Maintain products with care.** Keep the solar step light housing clean for better and safer performance. Inspect the light periodically. If damaged, have it repaired by a qualified technician.

INITIAL CHARGING / FIRST-TIME USE:

The battery in your solar step light must be fully charged before first time use. To charge the battery, follow the steps below:

1. Slide the AUTO/OFF Switch to the AUTO position.
2. Position the Step Light Solar Panel in direct sunlight for a period of 48 hours (approximately 4 days of sunlight exposure) to achieve full battery charge before first time use.
NOTE: Light will achieve optimum light output after 4 days exposure to full sunlight, enabling the battery inside to fully charge.
IMPORTANT: During the initial 4-day charge period, we recommend that the light is switched OFF each night to prevent it from activating and discharging the battery before it has fully charged.
4. After you have fully charged the battery, slide the AUTO/OFF Switch to the AUTO position.
5. Proceed with Installation steps below.
6. The light will illuminate with a low lumen light in the dark, and a high lumen light will shine when motion is detected.

TECHNICAL SPECIFICATIONS:

LED Light Settings:	50 Lumen (High) 5 Lumen (Low)
Rechargeable Battery Type:	3.7V Li-ion, 400mAh
Solar Panel:	Poly Crystalline Silicon
High Light Activation Time:	45 seconds
Charge Time (minimum):	6 hours
Motion Sensor Range:	5 meters 120° Horizontal

BATTERY REPLACEMENT (Fig.1):

1. Place the step light upside down so that the back is facing upwards.
2. Use a small screwdriver (not supplied) to remove the 5 screws securing the outer back cover on the back side of the step light.
3. Remove the plastic back cover from the front section of the step light to reveal the battery compartment.
4. Replace the old battery with a new rechargeable 3.7V 400mAh "AA." Lithium-ion battery.

IMPORTANT:
When the battery life is exhausted, ensure the battery is recycled or properly disposed of according to your local laws and regulations. Do not dispose of the battery in fire.

5. Replace the plastic back cover onto the front section of the step light. Take care to align the AUTO/OFF Switch inside the battery compartment. Press the plastic back cover down firmly until it locks (clicks) into position.
6. Re-attach the outer back cover onto the back side of the step light and secure the 5 screws using a screwdriver (not supplied).
7. Fully charge the new battery by following the steps provided in the section "Initial Charging / First-Time Use".
